

Floor Finish Liquefier/Stripper

A unique floor finish liquefier and extra heavy-duty stripper, designed for use in heavy build up areas. Blended with water based solubilizers, emulsifiers, and chelating agents. Utilizing the latest in technology, this powerful professional stripper unlocks the chemical bonds of acrylic and urethane fortified floor finishes releasing them from the floor surface and is suitable for use on most surfaces.

Part No: 251995

Directions:

Mop & vac stripping, apply liberally to floor and allow to sit about 5 minutes. Keep all areas wet by adding solution if necessary. Pick up solution with mop or wet vacuum. Rinse well. Allow floor to dry thoroughly before refinishing. Machine stripping, apply liberally to floor and allow to sit about 5 minutes. Keep all areas wet by adding solution if necessary. Scrub with stripping pad. Pick up solution with mop or wet vacuum. Rinse well. Allow floor to dry thoroughly before refinishing.

DILUTIONS:

Mop & Vac Stripping

Dilute 5:1 with cold water (26 oz. per gallon)

For heavy build up dilute 4:1 (1 quart per gallon)

Machine Stripping

Dilute 16:1 with cold water (8 oz. per gallon)

Benefits:

- Extremely Powerful
- Minimizes stripping time to reduce labor costs
- Removes all build-ups due to repeated burnishing
- Developed to quickly strip multiple coats of finish from a variety of floors.

Specification Data:

- | | |
|---------------------|------------|
| • FORM: | LIQUID |
| • COLOR: | LIGHT BLUE |
| • ODOR: | LEMON |
| • WETTING ABILITY: | EXCELLENT |
| • FLASH POINT: | N/A |
| • SPECIFIC GRAVITY: | 1.13 G/ML |
| • SOLUBILITY: | COMPLETE |
| • pH: | 13.1 |
