

## LIQUID DEFOAMER CONCENTRATE

A unique formulation designed to control foam wherever it's a problem, especially in carpet cleaning applicators. Eliminates or reduces foaming of spent detergent solutions in the pick-up process. Eliminates need for excessive emptying and rinsing of pick-up tanks. Reduces risk of vacuum motor damage due to foam overflow in extraction carpet cleaning equipment. Also excellent for use in the recovery tanks of automatic scrubbers.

## Directions:

Spray directly into pick-up tanks of extraction equipment or mop bucket used in the pick-up process. If extraction equipment contains detergent residue from previous use, add 1-1/2 ounces defoamer per 5 gallons detergent solution before cleaning to protect the motor.

Always test in an inconspicuous area prior to use.

Contact your Zenex representative for further information.

## Recommended Uses:

May be used with most carpet cleaning equipment, steam extraction, rinse extraction, brush or pad floor machines. Product can be used with hot or cold water.

## Specification Data:

• FORM:	LIQUID
• COLOR:	MILKY WHITE LIQUID
• ODOR:	NONE
• WETTING ABILITY:	EXCELLENT
• FOAMING:	NONE
• FLASH POINT:	NONE
• SPECIFIC GRAVITY:	1.003 G/ML
• SOLUBILITY:	MISCIBLE
• pH:	7.5
